

## Phono Box RS

### Highend phono preamplifier

- MM & MC capable
- Fully balanced double mono design
- Fully passive RIAA & DECCA equalisation
- Unique continuously variable input impedance loading, matches every cartridge (adjustment even while playing)
- RCA & XLR In & Out
- Superior low noise / low distortion
- Classy & elegant dip switches
- Metal casing protects against vibration and interference
- Faceplate silver or black

#### Technical data

Input impedance	Fixed 10 ohms or 47kohms, variable 10 - 1200 ohms
Load capacity switchable	100µF, 120µF, 200µF
Output impedance	50 ohms
Gain, MM / MC	RCA: 40, 43, 60 dB XLR: 45, 56, 66 dB
Signal to noise ratio	MM 89dB (97dB - IEC -A) MC 83dB (91dB - IEC -A)
THD, MM / MC	0,01% / 0,05%
RIAA accuracy	within 0,3dB/20Hz - 20kHz
Subsonic	18Hz / 24dB/Oktave
Input	RCA & XLR
Output	RCA & XLR
Power supply	+/- 18V/300mA DC; 220 - 240V, 50Hz
dimensions W x H x D (T with sockets)	200 x 72 x 194 (200)mm
weight	2000g without power supply

Retail price  
**799,00 €**

### Reference class phono preamplifier with unique impedance control

This ultra low noise and distortion preamplifier is made for the audio conniosseur and offers not only breathtaking performance but is capable to adapt to virtually any phono cartridge through variable impedance control. Impedance adjustment can be done while playback!

Due to use of best parts, like SSM2019 from Analod Devices as input stages and Linear Technology LT1010 as high current buffer stage, Phono Box RS delivers ultra low levels of distortion and noise. Its very low output impedance makes it insensitive to selection of interconnect cables and lenghts. Fully passive RIAA and DECCA equalisation is selectable. Phono Box RS offers fully balanced circuitry and both XLR and RCA inputs and outputs. All in all vinyl playback will never have sounded as clear, detailed and smooth, than with this superlative phono stage!
